What is a Digital Business Card?

A **digital business card** is a modern and eco-friendly way to instantly share contact details on smartphone via QR code or NFC.

It includes your name, title, company, and social links and can be updated anytime without reprinting.

Ideal for networking and lead generation, it supports multimedia and integrations to boost brand visibility and capture leads.

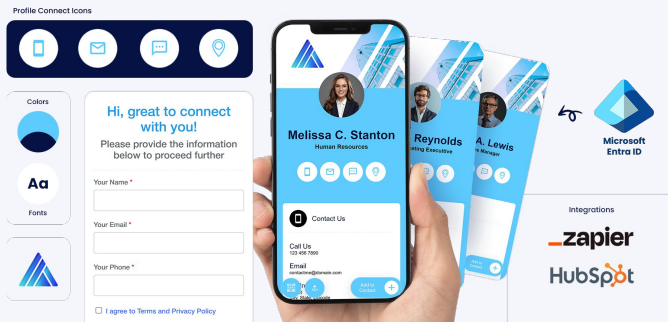

Digital Business Cards Are Not a Trend. They're an Upgrade.

Paper Cards

- ✗ Reprint cost per title change
- ✗ No visibility
- ✗ Lost cards = lost connections
- ✗ Manual distribution
- ✗ Static, no links
- ✗ Non-trackable

Digital Business Cards

- ✓ Update online anytime
- ✓ Track scans, shares, engagement
- ✓ Persistent QR/NFC access
- ✓ Remote rollout & deactivation
- ✓ Link to forms, video, calendars
- ✓ Lead capture & funnel tracking

What Enterprises Should Look For

 SOC2, GDPR, SSO, MFA

 AD/Google Workspace sync

 CRM integration (Salesforce, HubSpot)

 Role-based folder access

 Scan tracking by location/team

 NFC, Wallet, and web compatibility

 Dedicated onboarding and support

What information can you share with a Digital Business Card?

You can share a wide range of information on a QRCodeChimp's digital business card, including:

-  Contact details
-  Job/business information
-  Address, Google Map directions
-  Weblinks and social media links
-  Images, videos, and other multimedia

Trusted by The World's Top Brands

Benefits of QRCodeChimp's Digital Business card

Analytics	✓ GPS, Team, User	⚠ Basic
Support	✓ Dedicated	⚠ Generic
Platform Scope	✓ Org-Wide Control	⚠ Individual Use

Enterprise Challenges Solved by QRCodeChimp

Challenges	How QRCodeChimp Solves It
Field reps/events	NFC, Wallet, Forms
Outdated contact info	Real-time updates, no reprinting
Brand uniformity	White-label & design control
Poor lead capture at events	Built-in lead forms + CRM integration
No visibility into usage	Real-time scan analytics & GPS tracking
Role changes or exits	Update/deactivate cards instantly
Large-scale onboarding	Bulk-issue via CSV/AD sync
Multi-location operations	Organize by team/location
Brand protection	Template lock & domain control
Lead generation at events	Built-in forms & CRM sync
Stakeholder reporting	Analytics by user/region/team

Why Enterprises Use QRCodeChimp's Digital Business Cards

- Centrally manage 10s to 1000s of employees
- Automate card creation with AD/CSV/API
- Maintain brand consistency across teams
- Enable department-level management via sub-accounts
- Measure performance with team/user analytics

 Premium Feature

Create and Manage Digital Business Cards at Scale with AD Integration

Effortlessly onboard your team and manage digital business cards at scale with [Active Directory integration](#).

Automate card creation, maintain brand consistency, and support company-wide adoption with minimal effort.

 Premium Feature

Bulk Create Digital Business Cards with Bulk Upload Feature

Creating digital business cards one by one can be tedious and time-consuming.

With QRCodeChimp's [bulk upload](#) feature, generate multiple digital business cards at once using a simple CSV or Excel file—saving time, reducing effort, and streamlining onboarding.

Add sub-accounts to streamline digital business card management

Easily create multiple sub-accounts under a main account to enable structured collaboration and efficient digital business card management.

Assign full or limited access to sub-account holders for better control, visibility, and team-wide coordination.

(Total account = main account + sub accounts).

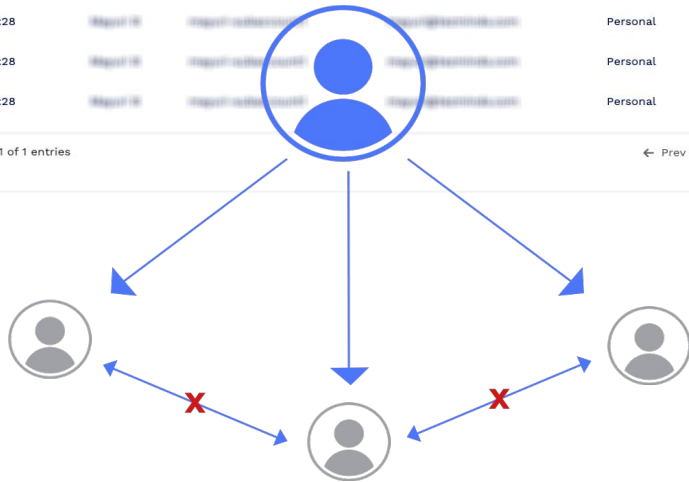

Sub-accounts Management

[+ Create a New Sub-account](#)

Date of Creation	Name	Login ID	Email	Access	Action

Showing 1 to 1 of 1 entries

[← Prev](#) [1](#) [Next →](#)

Share access with individuals to update the information on their own

This feature simplifies collaboration by allowing [shared access](#) to your digital business cards whether created individually or in bulk with options to edit, view contacts, or monitor analytics.

The screenshot displays the QRCodeChimp dashboard. The top navigation bar includes links for QR Code Generator, Solutions, Pricing, Articles, Support, Contact Sales, and a Dashboard button. A sidebar on the left lists various features like MY QR CODES, Analytics, Folders, File/Asset Manager, BULK OPTIONS, Bulk QR Codes, ACTIVE DIRECTORY, Users & Groups, COLLECTED DATA, Form Responses, EXPORTS/DOWNLOADS, Downloads, FOR RESELLERS, White Label Merchandise, White Label Earnings, Merchandise QR Codes, INTEGRATIONS, Active Directory, and RECENTLY DELETED, Trash.

The main content area is divided into two sections:

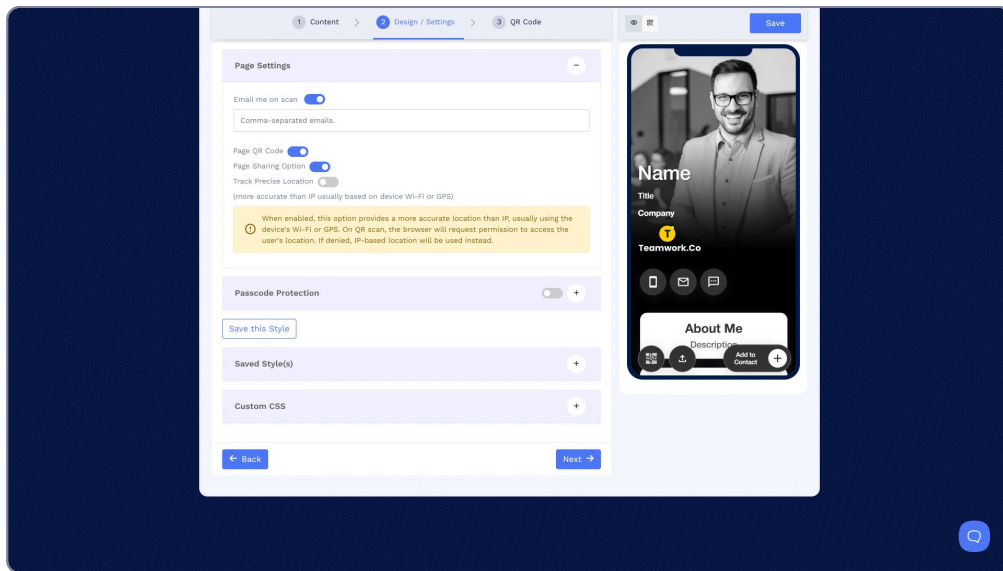

- Overview:** Contains four summary cards:
 - Total Scans: 62421
 - Current Month Scans: 1564 / ∞
 - Active Dynamic QR Codes: 391 / 900 (394 Created)
 - Static QR Codes: 191
- Folders:** Shows two folders: Folder 01 (18-Jun-2024, 3 items) and Folder 02 (29-Apr-2024, 0 items).
- QR Codes List:** Includes a search bar and a table of QR codes. The table has columns for Date, Name, Type, Total Scan, QR Code, and Action. The first entry is for Charles F Ohlson - DBC, created on 05-Feb-2024, with 13 total scans. The action column includes links for Download, Decorate, Edit, Share, and Move to folder.

At the bottom of the QR Codes List, it shows "Showing 1 to 10 of 563 entries" and a pagination control with links for Prev, 1, 2, 3, 4, 5, ..., 57, and Next.

Capture Precise Location on Every Scan

Gain deeper insights with GPS-based location tracking.

When users scan your QR code, you can capture their exact location (with permission) or fall back to IP-based tracking perfect for location-sensitive campaigns and analytics.

 Premium Feature

Effortless Lead Generation with Every Share

Capture interest the moment it happens.

Your digital business card comes equipped with built-in forms and the Collect Contact feature, making it easy for prospects to share their details instantly. Whether you're networking at events, in meetings, or connecting online, turn conversations into high-quality leads seamlessly and effortlessly.

 Premium Feature

Create Digital Business Cards with API

Ultima plan and above users can use our API to make digital business cards at scale.

 Premium Feature

Deliver a fully branded digital business card experience

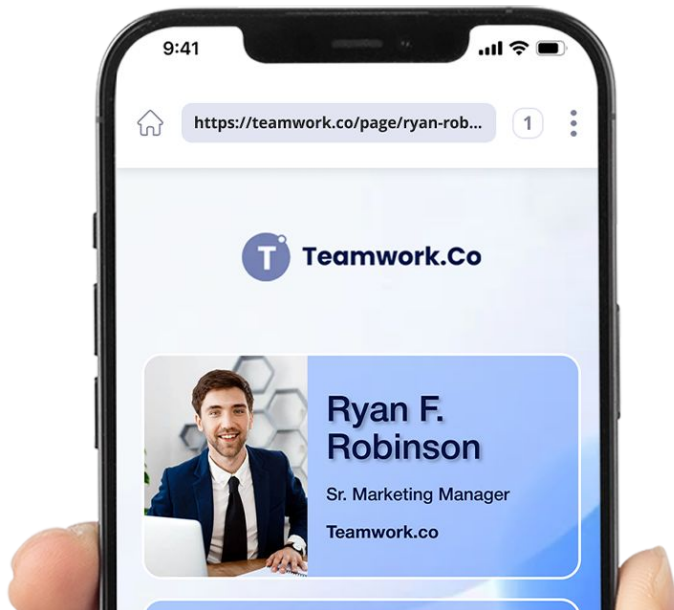

Use white labeling to replace default scan URLs (qrcc.me/linko.page) with your own domain URLs and apply your brand elements logo, colors, and naming to deliver a consistent, professional digital business card experience across every touchpoint.

Non White Labeled URL

<https://linko.page/ryan-rob...>

White Labeled URL

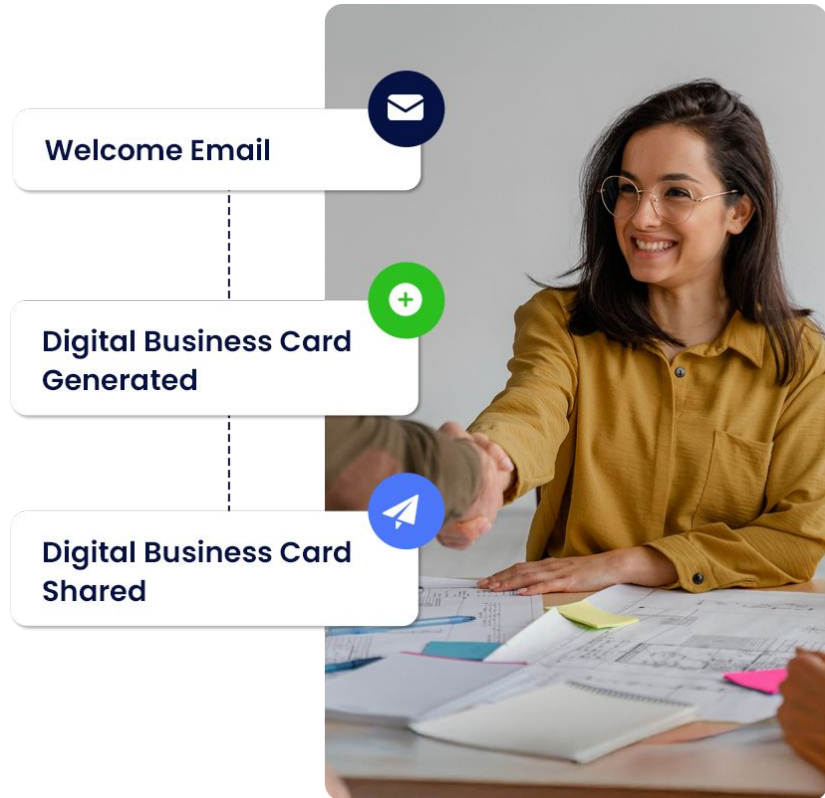

<https://teamwork.co/page/ryan-rob...>

Streamline Onboarding

Automate and centralize card generation

- Use employee data from Excel, AD, or HR tools
- Maintain brand templates and update logic centrally
- Empower users to edit their own info (with controls)
- Reduce IT workload
- Ensure consistency across teams
- Faster onboarding for new employees

How to share your contact with a Digital Business Card?

Share your contact effortlessly—whether it's a tap, scan, or click, your Digital Business Card works everywhere.

Choose from these convenient sharing options:

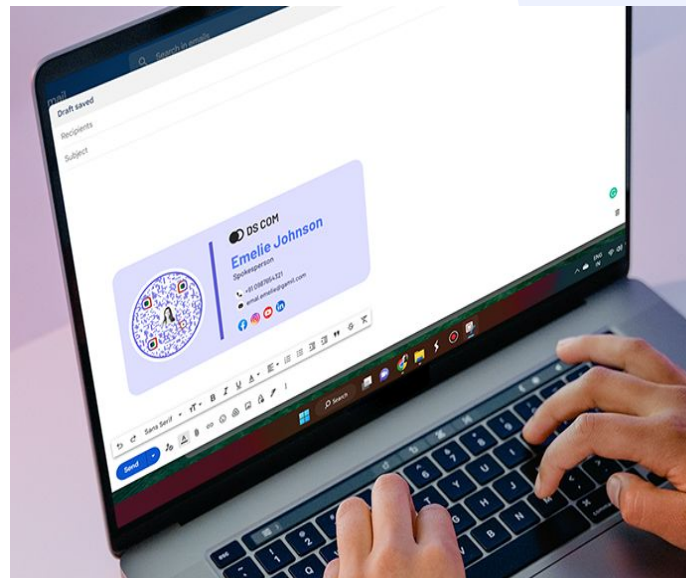

- Add to Apple and Google Wallet
- Embed in NFC Card
- Use as Email Signature
- Digital Profile URL
- QR Code

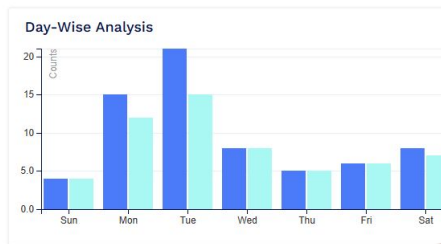

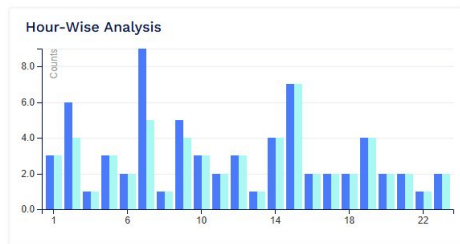

Best places to include a Digital Business Card QR code

You can share your digital business card by including its QR code in the following places:

- ✓ Business cards
- ✓ Email signature
- ✓ Websites and landing pages
- ✓ Social media

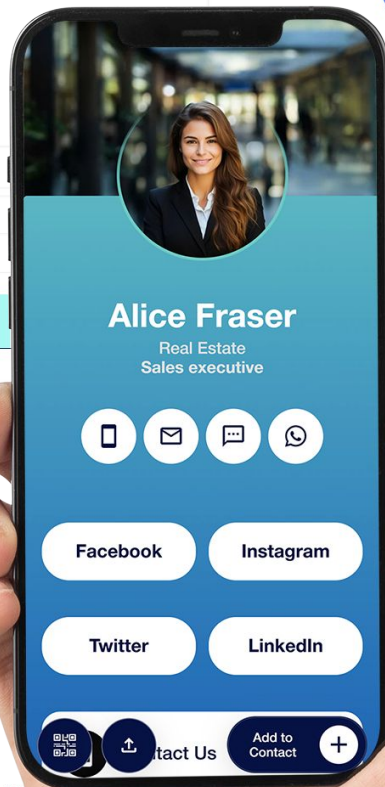

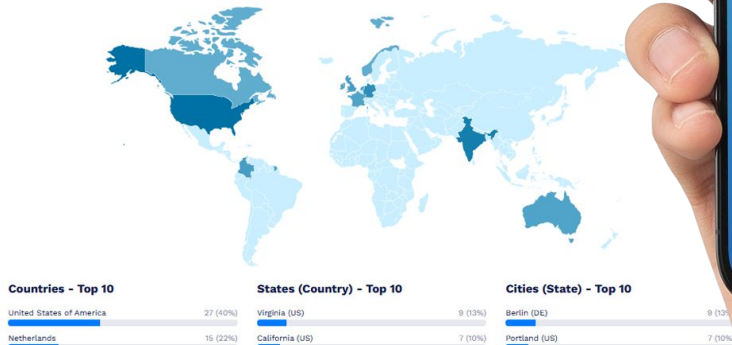

Unlock Advanced Analytics for Your Digital Business Cards

Device Analysis

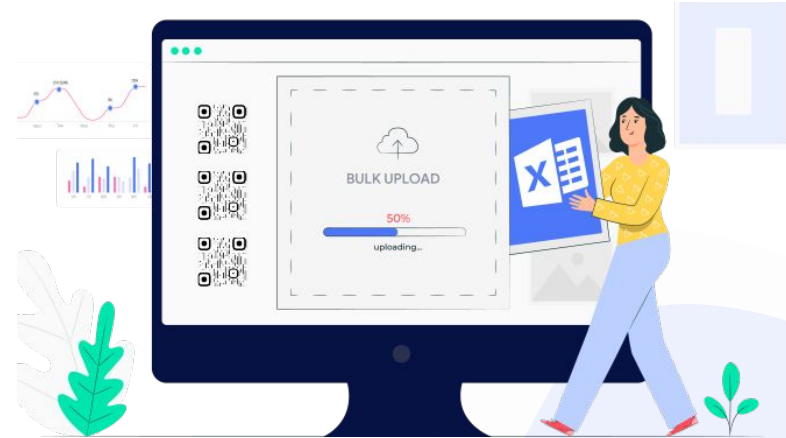

Geo Analysis (Location is based on the IP of the scanning devices and may not be always 100% accurate. For Pro and higher plans, browser-based tracking is used as a fallback solution if the user grants location permission while scanning — provided this feature is enabled for the QR code. Otherwise, IP-based location will be used.)

Why QRCodeChimp?

- ✓ A Comprehensive Digital Business Card platform
- ✓ Trusted by World's Top Brands
- ✓ Extensive design and customization options
- ✓ Professional Digital Business Card templates
- ✓ Advanced Scan Analytics
- ✓ Folders to Organize and Share Campaigns
- ✓ AD integration to generate DBC for large scale
- ✓ Whitelabeling Option
